Summary

Highly motivated IT student passionate about coding, reading, and music. Possesses a basic foundation in Java programming, responsive web development, and Linux system administration. Eager to leverage technical skills, adaptability, and problem-solving abilities in a dynamic IT internship to drive project success.

Skills

Programming Languages: Python · Java

Web Technologies: JavaScript · HTML · CSS

Database & Tools: MySQL · Firebase · AWS · Jupyter Notebook · VS Code

Projects

AI Weather Prediction System Bhubaneswar, India
2025 - Present

Designed a weather prediction system using Python, leveraging machine learning algorithms to train the model also used Streamlit for deployment purpose. The system provides real-time weather forecasting and tracks key parameters such as temperature, humidity, AQI, wind speed, and precipitation, complete with GPS integration for location-specific data.

Music Streaming Platform Bhubaneswar, India
2025 - Present

Designed a music streaming platform using JavaScript, JSON, HTML, and CSS. It allows users to play and pause music. An AI-based lyrics assistant is available, and a mixer mode enables users to mix songs.

Education
